

## A New Look On Spinal Cord Injury

### Spinal Cord Injury:

A Difficult, Predictable  
Past

Those who have lost the ability to walk are likely to hear the standard prognosis: “recovery is unlikely”.

### TheraStride:

A Brighter, Revolutionary  
Present

Welcome to the world of TheraStride: a state-of-the-art therapeutic tool designed to provide patients with new levels of ergonomic, comfortable retraining support. The TheraStride Body Weight Support Trainer provides highly customizable comfort for accelerated rehabilitation of SCI patients across a wide spectrum of ages, weights, and levels of physical challenge.

### Rehabilitation:

An Effective, Hopeful  
Future

TheraStride is achieving, more quickly than any other support machinery, the primary aim of rehabilitation: helping patients regain as much of their ability to move – and even walk – as possible. To find out more about rehabilitation with TheraStride, and to read about some of the amazing success stories that surround it, visit us on the web at:
